PROJECTS

Wireframming & Prototyping

- **Balsamiq Wireframming tool**
- Worked as a UI/UX designer on several projects where I was responsible for Creating wireframes and prototyping.
- I have Created wireframes for an online pharmacy store, an event management system, and E-Commerce wireframe resembling Amazon .
- Utilized Balsamiq as a primary tool to develop comprehensive wireframming and prototyping design.

Web Development (Final Year Project)

- **Online Car Accessories Shop**
- As a part of my final year project, I developed an Online car accessories shop website using HTML, CSS, JavaScript, Bootstrap, PHP and MYSQL.
- My specific responsibilities included coding, designing and developing the website.
- I also assisted with inventory management, payment gateway integration.
- I have hands on experience in building and maintaining e-commerce websites and have knowledge of best practices for web development, team collaboration, and user-centered design.

Front-end Web Development Projects

- **Borhan Educational Website, Home Tutoring Quran Website. Resume Website .Cat Photo Gallery Website, Amazon Website Landing Page, Tesla UI Website**
